About Me

I am an innovative and collaborative software developer and data analyst with over three years of experience in creating and developing websites and mobile applications, driven by a passion for delivering impactful results. My unique combination of software development and data analytics skills, honed through my experience and intensive training, allows me to approach problems from a unique perspective. This has proven invaluable in my previous role, where i was able to develop innovative solutions to enhance company services and adapt to updated government programs. My ability to understand business operations and analyze data to drive impactful results sets me apart in the field of Data Analytics. Based on my proven track record, keenness to learn, and collaborative spirit, i am confident in my ability to make meaningful contributions to any team i join.
