PROBLEM SCOPE

PROBLEM STATEMENT

What are the characteristics of successful projects that investors should look for in potential future investments?

SCOPE

This project focuses on identifying Kickstarter Projects from 2009 – 2017 for a potential future investments

OBJECTIVES

- ★ Provide insights for investors on potential future successful projects and trends.
- ★ Identifying category with the highest success rate.
- ★ Identifying impact of backers and goal completion on project succession.

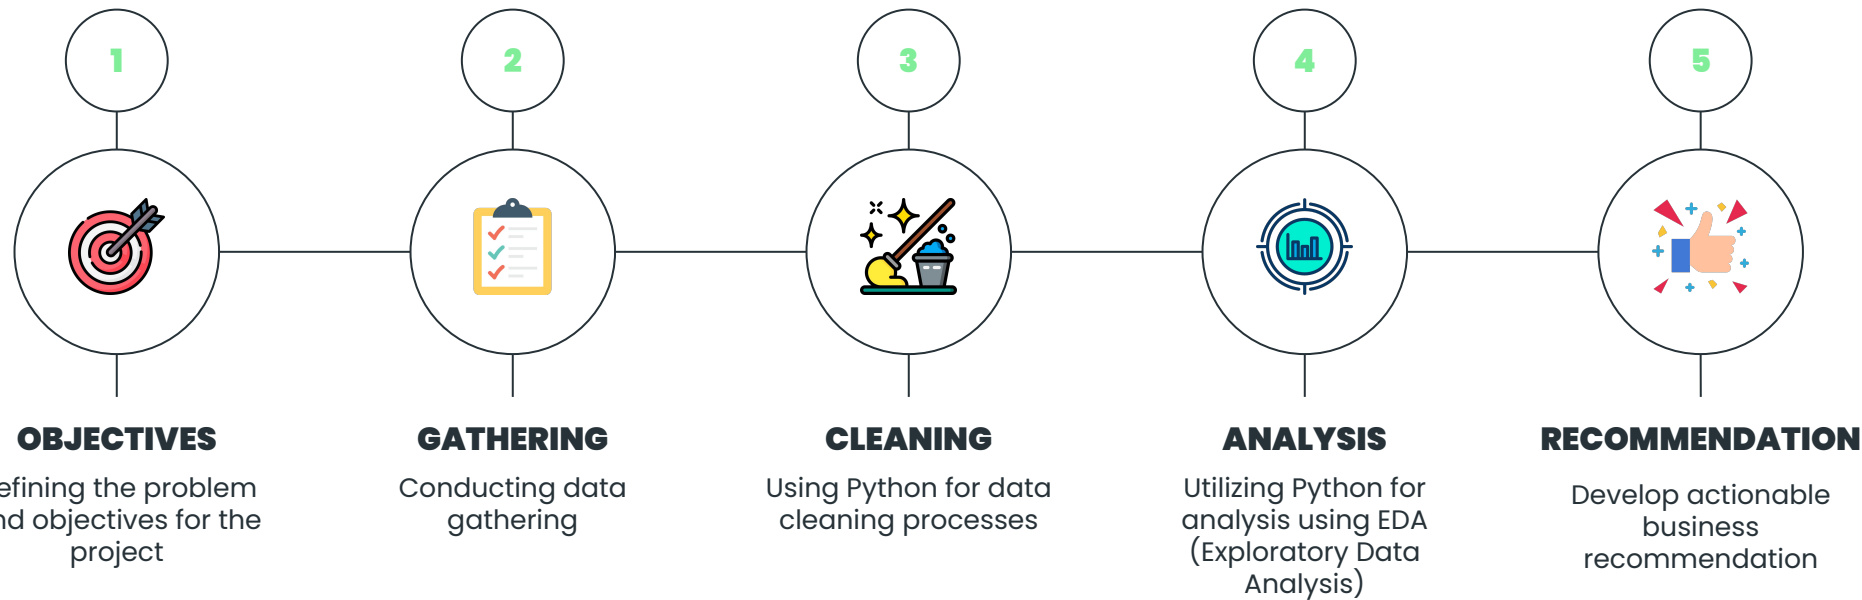

KICK
STARTER

Methodology

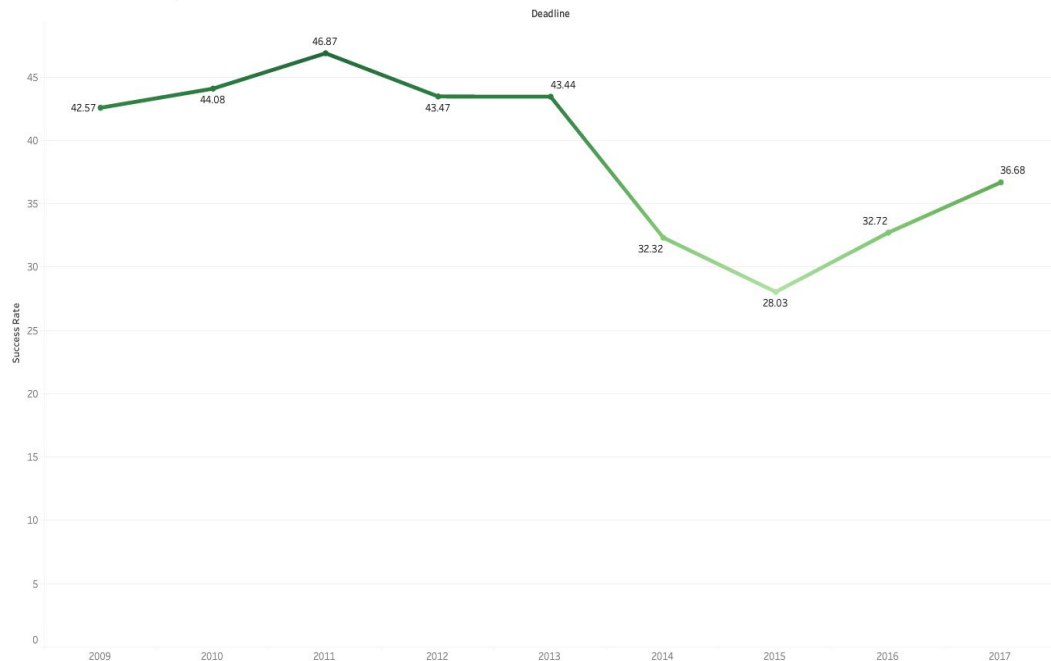

METHODOLOGY

Analysis

The **success rates** of Kickstarter projects have shown a **stable trend** from 2009 to 2013, followed by a **decline** in 2014 and 2015, and a **subsequent recovery and stabilization** in 2016 and 2017.

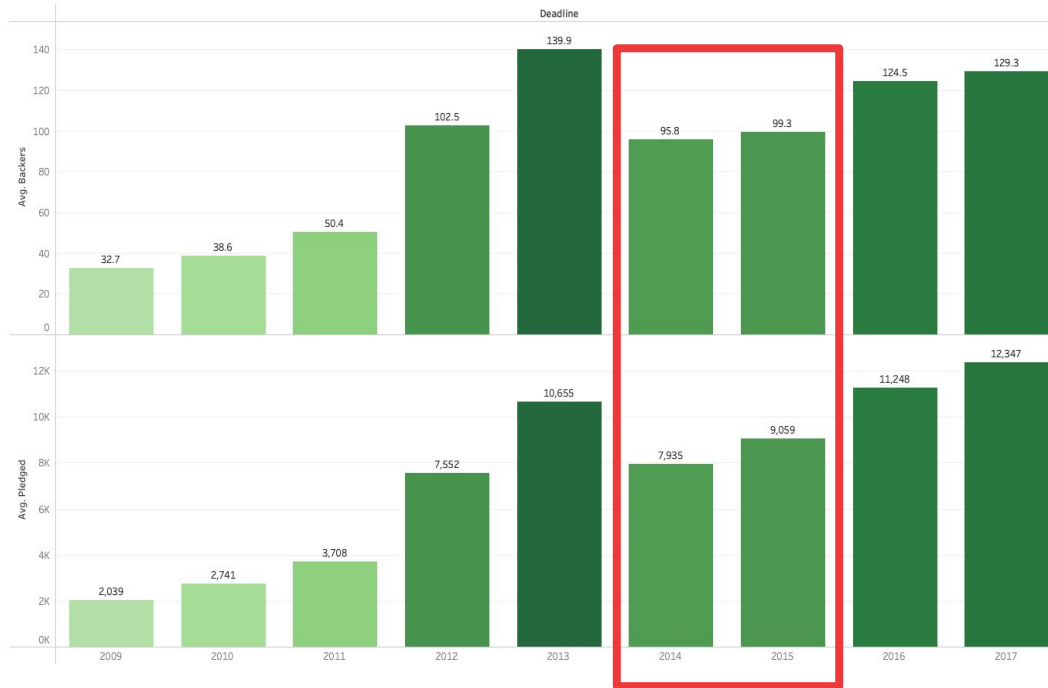

Stable Trend (2009–2013) ranging from 43% to 47%.

Declining Trend (2014–2015) dropping to 32% in 2014 and further to 28% in 2015.

Recovery Trend (2014–2015) recovering in 2016 and 2017, increasing to 33% and 37%.

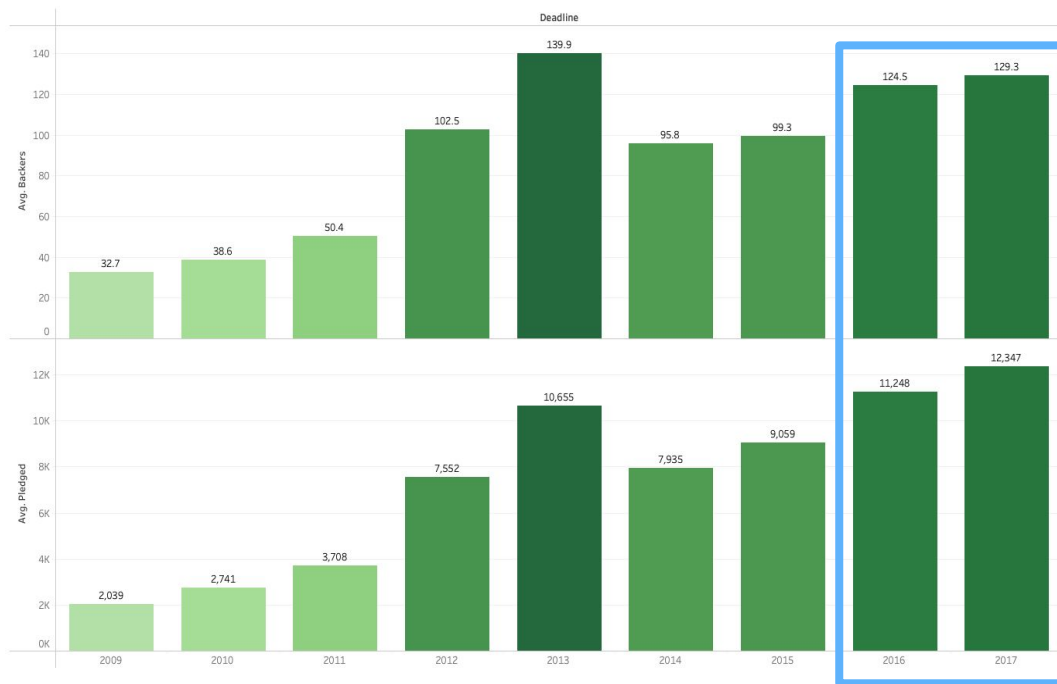

The declining trends in 2014 and 2015 can be attributed to a decrease in both the **number of backers** and the **amount of money pledged** to the projects.

Backers (2014–2015) the number of average backers decreased to 96 and 99 in 2014 and 2015.

Pledged (2014–2015) average pledged amount of money dropping to \$7935 in 2014 and \$9059 in 2015.

The recovery and stabilization trends in 2016 and 2017 coincided with an **increase** in support from both the **number of backers** and the **amount of money pledged** to projects.

Backers (2016-2017) the number of average backers increased to 124 and 129 in 2016 and 2017.

Pledged (2016-2017) average pledged amount of money increased to \$11,248 in 2016 and \$12,347 in 2017.

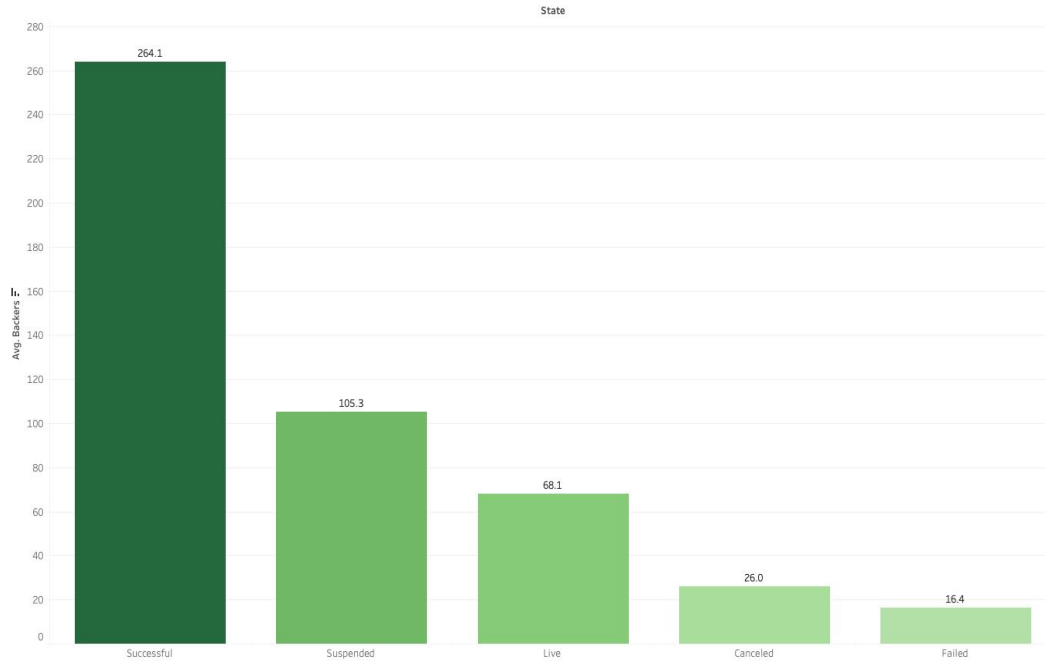

There is **positive correlation** between the **success rate of Kickstarter projects** and the average **number of backers**, indicating that projects with a higher number of backers tend to have higher success rates.

Up Trend (2009-2011) & (2015-2017) indicated that there is an increased number of backers from 32 to 50 (2009-2011) and 99 to 129 (2015-2017)

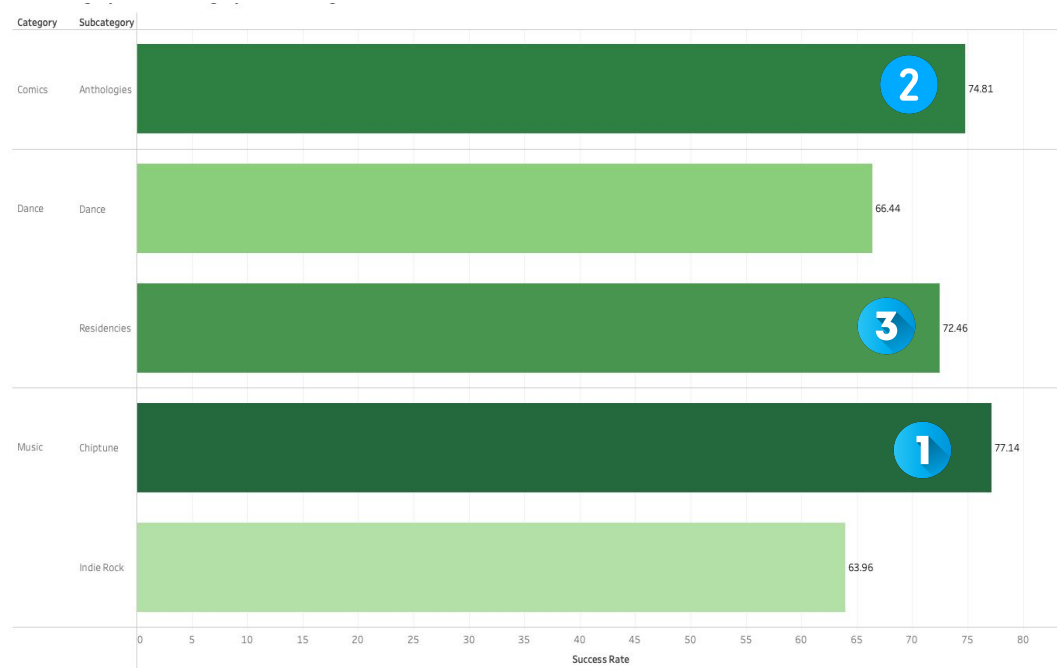

Down Trend (2013-2014) shows a decreased number of backers from 43 to 33.

Project with **higher number** of backers,
are more likely to be success.

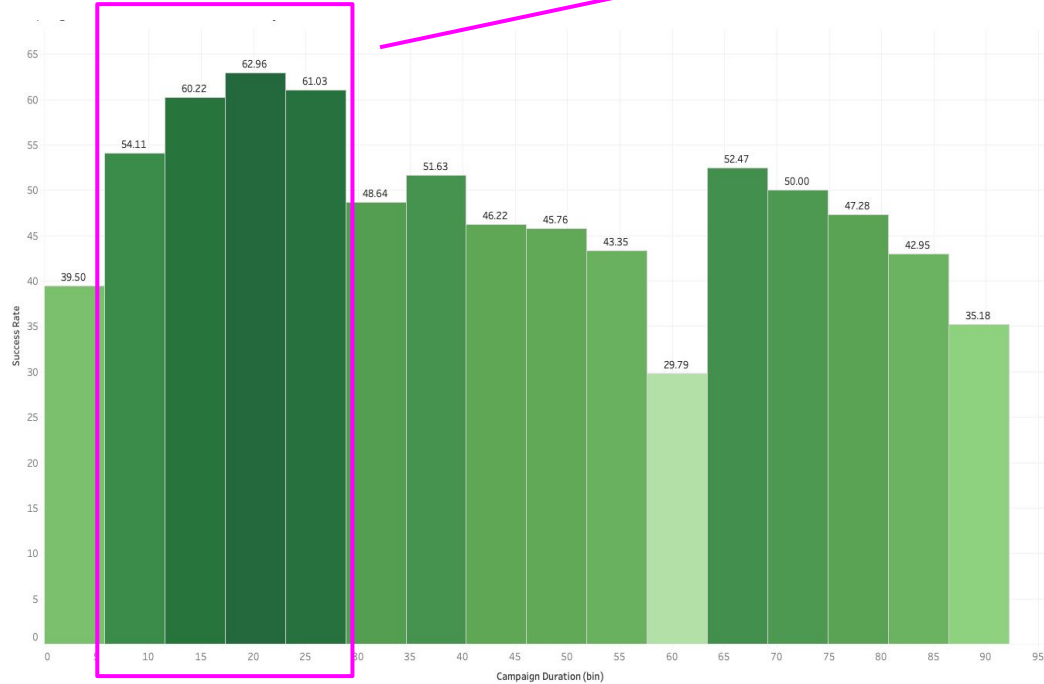

Successful Projects have the highest average number of backers rather than the other project state, indicating that project will be succeeded with more support from backers.

Comic, Dance, Music are the top 3 project categories with the highest success rate.

Music (Chiptune) projects have the highest success rate among project categories, at 77.14%. **Comic (Anthologies)** follow closely behind at 74.81%, and **Dance (Residencies)** projects come in third at 72.46%.

Faster goal completion is associated with higher project success rates.

Completion Time = Deadline Date - Launched Date

Projects are more likely to succeed when **their funding goals are achieved quickly**.
The average recommended funding goal completion time is between **6 and 29 days**.

Project that meet their funding goals have a significantly **higher success rate**, with **over 35% difference** compare to projects that do not reach their funding goals.

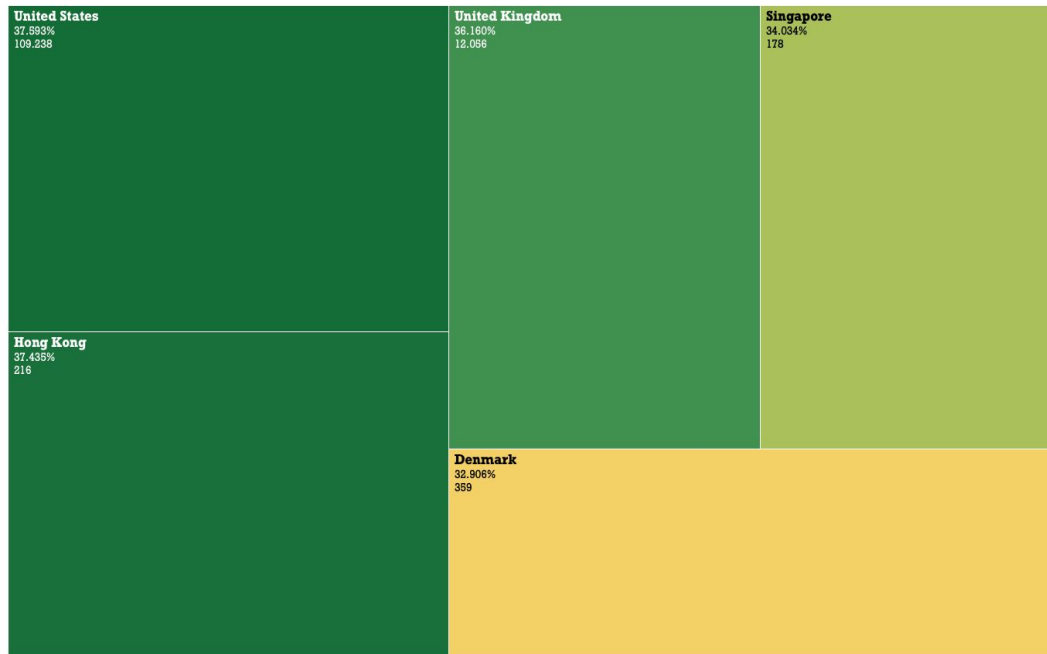

Status Goal	Total Project	Success Rate (Completed)	Success Rate (Not Completed)	Success Rate (All Project)
Completed	135290	99.26%	0.98%	35.82%
Not Completed	239563	0.74%	99.02%	0.62%

Success Rate (completed) = Successful Project (Goal Completed) / Total Project (Completed)

Success Rate (not completed) = Successful Project (Goal Not Completed) / Total Project (Not Completed)

Success Rate (all project) = Successful Project (Goal Completed) / Total Project

The **top five countries** with the highest success rates of Kickstarter projects are the **United States** (37.59%), the **United Kingdom** (36.16%), **Hong Kong** (37.43%), **Denmark** (34.03%), and **Singapore** (32.90%).

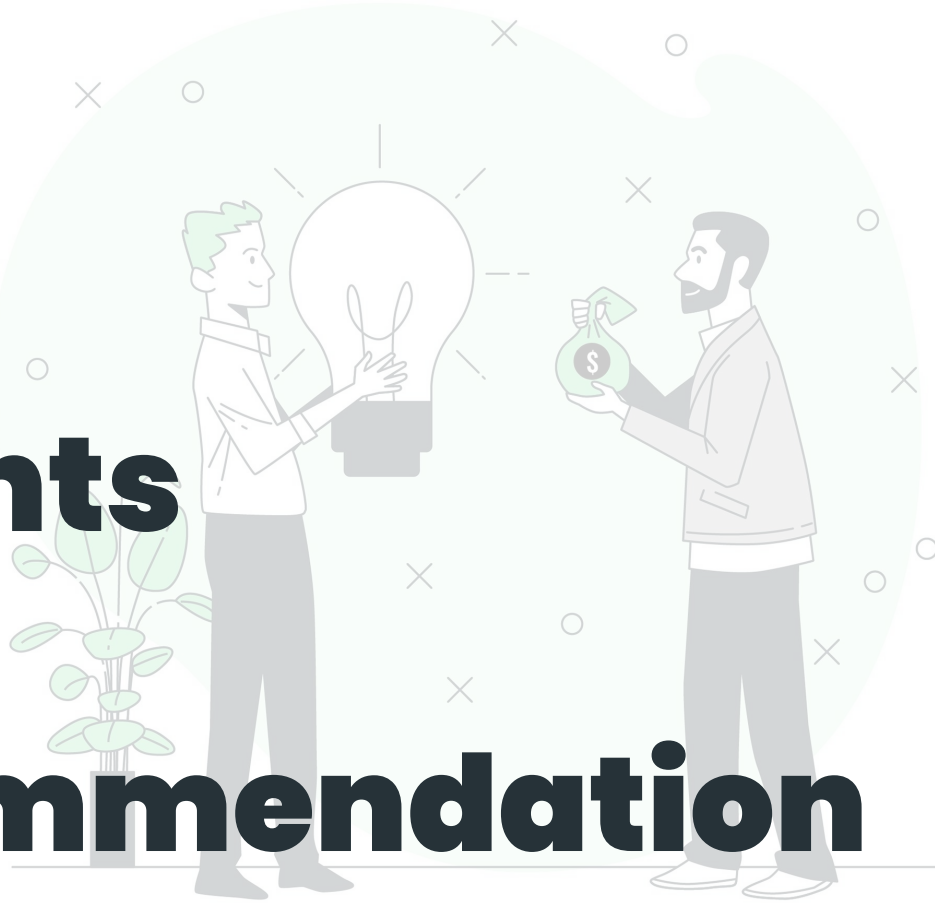

United States has the highest success rate at 37.59% with 109,238 project successful.

Hong Kong has the second highest success rate at 37.43% with 216 project successful.

United Kingdom, Denmark, Singapore
With 12,056, 178, and 359 project successful.

Insights And Recommendation

1. Overall, the success rates of Kickstarter projects have shown stability over the years, with some fluctuations.
2. The decline in success rates in 2014 and 2015 was likely due to a **decrease in both backers and pledged amounts**, while the recovery in 2016 and 2017 **coincided with increased support**.
3. Projects with a **higher number of backers tend to have higher success rates**, highlighting the importance of building a strong backer community.
4. Categories like **Comic, Dance, and Music** have consistently high success rates, indicating their popularity among backers.
5. **Faster goal completion** is a key factor in project success, suggesting that setting realistic and achievable funding goals is crucial.
6. **Meeting funding goals** significantly increases the chances of project success, emphasizing the importance of careful planning and budgeting.
7. The United States, the United Kingdom, Hong Kong, Denmark, and Singapore are the top countries for Kickstarter project success, indicating global interest and support for crowdfunding initiatives.

Steps for choosing the potential project for investment

Step 01	Goal Completion	Completion of goals, in terms of both time and money, should be a focus, with particular attention to the amount of money pledged by the crowd.
Step 02	Number of Backers	Backers are people that backed or supported the project, the higher the number of backers in the project is more likely to be successful because it already have the people interest.
Step 03	Project Category	Based on the data from the previous year, select one of the top 5 subcategories from the most successful category.
Step 04	Country	Selecting from the top 5 countries that produce the most successful projects.
